

COGNITA

An inspiring world of education

Drug and Alcohol Policy

September 2017

1.0 Introduction

- 1.1 The aim of a Drug and Alcohol Misuse Policy is to acknowledge and clarify the school's role in drug prevention and education and ensure it is appropriate to meet pupils' needs. This policy provides information about drug education, as well as procedures to respond to any drug-related incident.
- 1.2 The school policy aims to ensure that the approach taken on the issue of drugs is a whole-school one and is part of our commitment to, and concern for, the health and well-being of the whole school community. Teachers will need to be confident and skilled to teach drug education and pupils need to receive up to date, relevant and accurate information, as well as support.
- 1.3 This policy should be read in conjunction with the policies and documents listed on the back page of this document.

2.0 Statutory duties

- 2.1 Schools have a statutory duty to promote pupils' wellbeing and hence have a clear role in preventing drug misuse as part of their pastoral care. Although there is no statutory requirement to have a Drug Policy, it is the advice of the DfE, and a requirement for all Cognita schools, that they should have one as a clear procedure for managing any incidents. It is essential to protect staff, parent/carer(s) and children and young people.
- 2.2 The Statutory Framework for the Early Years Foundation Stage (2014) requires the following (para 3.56): 'Providers must not allow smoking in or on the premises when children are present or about to be present.' While there is no specific requirement to hold a no-smoking policy per se, Cognita Schools are required to continue to maintain as such. This includes offsite trips and visits. Furthermore, practitioners must not be under the influence of alcohol or other substances.

3.0 Application

- 3.1 This policy applies to all pupils on roll at the school. It applies when being educated in school, when on educational visits and when off-site at school related events. The policy applies when pupils are travelling to and from school on public transport. Any responsibilities of adults refers to employees and others acting in a supervisory role with pupils.

4.0 Terminology

- 4.1 Drugs refers to medicines, volatile substances, alcohol, tobacco, illegal drugs, other unauthorised substances and New Psychoactive Substances (NPS) often referred to as 'Legal Highs'. 'Drugs' here are taken to mean those that are legal, such as alcohol, tobacco and solvents, over the counter and prescribed drugs, and illegal drugs such as cannabis, ecstasy, amphetamines, heroin, crack/cocaine, LSD, etc.

5.0 The school's stance on drugs, health and the needs of pupils

- 5.1 It is inappropriate and unacceptable for pupils to bring substances into school, have them on their person, consume them before, during and after school and on the way to or from school, including on school visits etc. Cognita Schools has a strict no smoking policy.
- 5.2 The school believes that the possession and/or use of drugs in school, during the school day or while travelling to/from school, is inappropriate. The drugs/substances covered by this policy are not to be bought, sold or otherwise exchanged, brought onto school premises during the school day or while pupils are on school visits. Individual exceptions may be made for pupils who require prescription medicines where appropriate.

6.0 Policy Framework

6.1 Drugs Education

- The school provides drugs education in the following way:

At King's School we believe that children should be informed of the benefits and dangers of drugs, both prescribed and illegal. We deliver an age appropriate curriculum about drugs and alcohol in school, where the children feel safe and supported in asking and answering their questions through our Citizenship lessons. Where necessary, we cooperate with outside agencies to ensure a full coverage of the curriculum for the children, but also to support staff and offer appropriate training.

Key stage 1

- Discuss use of medicines and drugs and how they can affect our bodies.
- Taught about medicines prescribed by doctors and why they help us.
- Taught about the dangers of eating berries in the garden
- Discuss religions that have a no alcohol policy
- Signs and symbols on bottles/packaging – dangers

Key stage 2

- Discuss keeping our bodies healthy, including effects of drinking, smoking, legal and illegal drugs, caffeine, solvents etc.
- Discuss making right and wrong choices and taking responsibility for our actions – drinking/smoking – age limits.
- Discuss the power of peer pressure – linked to life skills

Throughout King's School we also respond to opportunities as they arise throughout the school year. Issues may be discussed in assemblies or in the classroom. Staff are available to discuss issues with children privately or children in key stage 2 can use their You and Me book to raise any concerns.

- The school uses the following external support and guidance to deliver its drugs education programme:
 - Devon CAP and local police liaison officer.

6.2 Staff support and training

The school is committed to providing drug awareness training in the induction of all staff working at the school and on an ongoing basis for staff involved in drugs education.

6.3 Management of an incident

- Where there is evidence or suspicion that a pupil has drugs, has used drugs or has passed on drugs to another person, the school will follow its Behaviour Policy and may also use its power to search a pupil. Sanctions will be applied as outlined in the Behaviour Policy.
- Where it is believed that a parent or carer is under the influence of drugs on the school premises they will be asked to leave. If a parent or carer refuses to leave, the Headteacher or

their representative will call the police. Where there are serious or ongoing concerns, the school may consider banning a parent from entering the school site.

- See Appendix B – Responding to incidents involving drugs.

6.4 Police and emergency involvement

- The school will immediately refer illegal or unlawful incidents to the police.
- See Appendix A for guidance on drug situations linked to medical emergencies.

6.5 The needs of pupils

The school will exercise its pastoral responsibilities and always look to support pupils and ensure that pupils have access to appropriate support and guidance.

6.6 Information sharing

The school will share information with law enforcement agencies and safeguarding agencies as outlined in the Safeguarding Policy. The school works to the requirements of *Working Together to Safeguard Children*.

6.7 Involvement of parent/carer(s)

The school will inform parents and carers of any drug related incidents.

6.8 Staff conduct and drug use

All staff are required to adhere to the Staff Code of Conduct. Staff are subject to the Cognita disciplinary and other HR procedures.

6.9 The role of the Headteacher

- The Headteacher takes overall responsibility for the policy and its implementation, for liaison with the Assistant Director of Education and any governance meetings, parent/carer(s), and appropriate outside agencies and bodies such as the LA.
- The Head will ensure that all staff dealing with substance issues are adequately trained and supported. Cognita cannot knowingly allow premises to be used for the production or supply of any controlled drug. Where it is suspected that substances are sold on the premises, details of those involved, as well as much information as possible, will be automatically passed to the police.

7.0 **Implementation of the policy**

7.1 Schools are strongly advised to adopt the procedures set out in [DfE and ACPO Drug Advice for Schools \(DFE-00001-2012\)](#) when dealing with incidents involving substance misuse or supply on the premises/during the school day or during school trips and visits etc.

7.2 The Headteacher should ensure that all staff, parents/carers and pupils are reminded of these procedures on an annual basis.

7.3 Situations requiring first aid will be dealt with immediately as per the school's agreed policies and procedures. Information about emergency help for people who have had a bad reaction to drugs can be found at <http://www.talktofrank.com/emergency-help>.

7.4 In cases of substance misuse or supply on the premises during the school day or during school visits, the case will be discussed with the young person and a written record taken (see Appendix C). Parents/carers will be informed by the Headteacher as soon as possible. The support of outside agencies will be sought if appropriate.

- 7.5 While there is no legal obligation to inform the police, they may be involved at the discretion of the Headteacher in consultation with the Assistant Director of Education. The school will consider each incident individually and will employ a range of responses to deal with individual incidents. The Headteacher will inform the Assistant Director of Education in relation to all drug-related incidents.
- 7.6 If there is a significant seizure of a suspected illegal substance, schools should inform the police at an early stage and take steps to minimise handling the substance to aid future forensic investigation.

8.0 Specific procedures

8.1 Dealing with information and confidentiality

- Schools are an important source of support for pupils experiencing problems with drugs and must ensure that all staff (teaching and non-teaching) understand the limits of confidentiality, balancing the desire to maintain confidentiality and support the young person with the duty to safeguard and promote the welfare of the young person and others. The school Safeguarding Policy and Procedures must be followed. Staff cannot and should not promise total confidentiality.
- There are important reasons why personal and sensitive information needs to be shared in relation to child protection (e.g. when working with the police, referral to external agencies etc). The Data Protection Act and Crime and Disorder Act allow personal information to be shared if there is an over-riding public interest in the first instance, or to prevent crime and disorder in the second. However, in assessing the suitability of sharing information, all efforts should be made to encourage the young person to give their informed consent. If a decision is taken to share confidential information, a written record of any concerns, including the reasons for breaching a pupil's confidentiality, should be made.
- The following questions should also be considered:
 - How serious is the situation?
 - What immediate and significant risk does the young person face?
 - What implications (both positive and negative) could keeping a confidence have?
 - Could significant harm result from keeping the young person's disclosure confidential?
 - Young people must, whenever possible, be made aware of the limitations of confidentiality before they disclose a confidence. If a confidence needs to be broken, the school should explain to the young person (and parents/carers as appropriate): why the confidence was broken, who will be/has been informed, what will be/was disclosed, how the information will be used and that their privacy will be respected and information.

8.2 Parental substance misuse

- Parental substance misuse has the potential to impact negatively on outcomes for children and young people. [Hidden Harm: Responding to the Needs of Children of Problem Drug Users. ACMD: 2003 estimated that 2-3 per cent of children are affected by problematic parental substance use. This estimate only covers parents with serious dependencies on heroin and crack cocaine, and does not account for children affected by alcohol or other drug use in the household.
- Substance use in itself is not a reason for considering a child to be suffering or at risk of suffering significant harm, although it may be a contributing factor.
- The DSL or Head will liaise with the police and/or external agencies where required.

8.3 Legal drugs

The police will not normally need to be involved in incidents involving legal drugs, but schools may wish to inform trading standards or police about the inappropriate sale or supply of tobacco, alcohol or volatile substances to pupils in the area.

8.4 Controlled drugs (including New Psychoactive Substances)

In taking temporary possession of suspected controlled drugs, the school will:

- Ensure that a second adult witness is present throughout;
- Seal the substance in a plastic bag and include details of the date and time of the seizure/find and the witness present;
- Store it in a secure location, such as a safe or other lockable container with access limited to senior members of staff. DO NOT dispose of the substance since disposal can now only be done by the constabulary;
- Notify the police without delay, who will collect it and then store or dispose of it in line with locally agreed protocols. The law does not require a school to divulge to the police the name of the pupil(s) from whom the drugs were taken but the police advise that this is disclosed. The school should determine their position on this in advance to ensure consistency of approach;
- Record full details of the incident, including the police incident reference number if they are involved;
- Inform parents/carers, unless this is not in the best interests of the pupil;
- Identify any safeguarding concerns and respond appropriately; and
- If there is a significant seizure of a suspected illegal substance, schools should inform the police at an early stage; and take steps to minimise handling to aid future forensic investigations.

8.5 Searching, Screening and Confiscations

[Searching, Screening and Confiscation at School](#) (DfE, 2014) states that: school staff can search a pupil for any item if the pupil agrees, noting that the ability to give consent may be influenced by the child's age or other factors. Headteachers and staff authorised by them have a statutory power to search pupils or their possessions without consent where they have reasonable grounds for suspecting that the pupil may have a prohibited item. Prohibited items include alcohol and illegal drugs. The law says that the person conducting the search may not require the pupil to remove any clothing other than outer clothing.

8.6 Use of external input

- Children and young people often find visitors to school a useful and informative part of their learning, but equally research suggests that for visits to be successful there should be a shared understanding about the nature and content of the session/s. Government guidance is that schools should exercise caution with the use of visitors as there is some evidence that particular messages can have a detrimental impact on young people's intentions to resist using drugs including alcohol. Particular caution should be used when visitors have had first-hand experience of problematic drug use.
- Schools should ensure that visitors are appropriately qualified and trained to deliver work with children and young people in a school setting. They should also be aware of good practice that recommends the avoidance of shocking images and inappropriate descriptions of drug use and have a clear understanding of the aims and objectives of the session and have seen, and understood the school's Drug Education Policy.
- Visitors must be briefed on any particular sensitivities that there may be in the student group – these may include identified drug issues by particular students or their families – as well as any broader needs within the group. Teachers should negotiate the content of the session which is linked to the broader drug education and PSHE delivered by the school and relevant to the identified needs of the pupils. Visitors should be made aware by the teacher that they are aware of the school's protocols for dealing with any disclosures or distress shown by pupils during the session.
- Teachers should be present at all times when such a visitor is in the class, and be ready to be an active participant in these sessions. They should ensure that they reflect on the learning from particular sessions with pupils and visitors, assessing the learning, and building skills to support

and enable pupils to make healthy choices and to avoid risk-taking behaviour. Teachers should follow-up any unresolved issues or concerns and extend the learning begun by the visitor.

9.0 National support and advice from organisations

- Drinkline: A free and confidential helpline for anyone who is concerned about their own or someone else's drinking: 0800 917 8282.
- Family Lives: A charity offering support and information to anyone parenting a child or teenager. It runs a free-phone helpline and courses for parents: 0800 800 222.
- FRANK: National drugs awareness campaign to raise awareness among young people and their parents/carers: www.talktofrank.com. Schools can receive free resources, updates, newsletters etc.
- Smokefree: NHS stop smoking support: www.nhs.uk/smokefree.
- FRANK: Advice on what to do to help someone who's having a bad reaction to drugs: www.talktofrank.com/emergency-help.
- Resuscitation Council (UK): Guidelines for resuscitation procedures: www.resus.org.uk/pages/GL2010.pdf.

Appendix A : Drug situations – medical emergencies

The procedures for an emergency apply when a person is at immediate risk of harm. A person who is unconscious, having trouble breathing, seriously confused or disorientated or who has taken harmful toxic substance, should be responded to as an emergency.

The main responsibility is for the pupil at immediate risk, but you also need to ensure the well-being and safety of others. Put into practice your school's first-aid procedures. *If in any doubt, call medical help.*

Always:

- assess the situation
- if a medical emergency, send for medical help and ambulance

Before assistance arrives

If the person is conscious:

- ask them what has happened and to identify any drug used
- collect any drug sample and vomit for medical analysis
- **do not** induce vomiting
- **do not** chase or over-excite them if intoxicated from inhaling a volatile substance
- keep them under observation, warm and quiet

If the person is unconscious:

- ensure that they can breathe and place in the recovery position
- **do not** move them if a fall is likely to have led to spinal or other serious injury which may not be obvious
- **do not** give them anything by mouth
- **do not** attempt to make them sit or stand
- **do not** leave them unattended or in charge of another pupil
- notify parents/carers

For needle stick(sharps) injuries:

- encourage wound to bleed. **Do not** suck. Wash with soap and water. Dry and apply waterproof dressing
- if used/dirty needle seek advice from a doctor

When medical help arrives

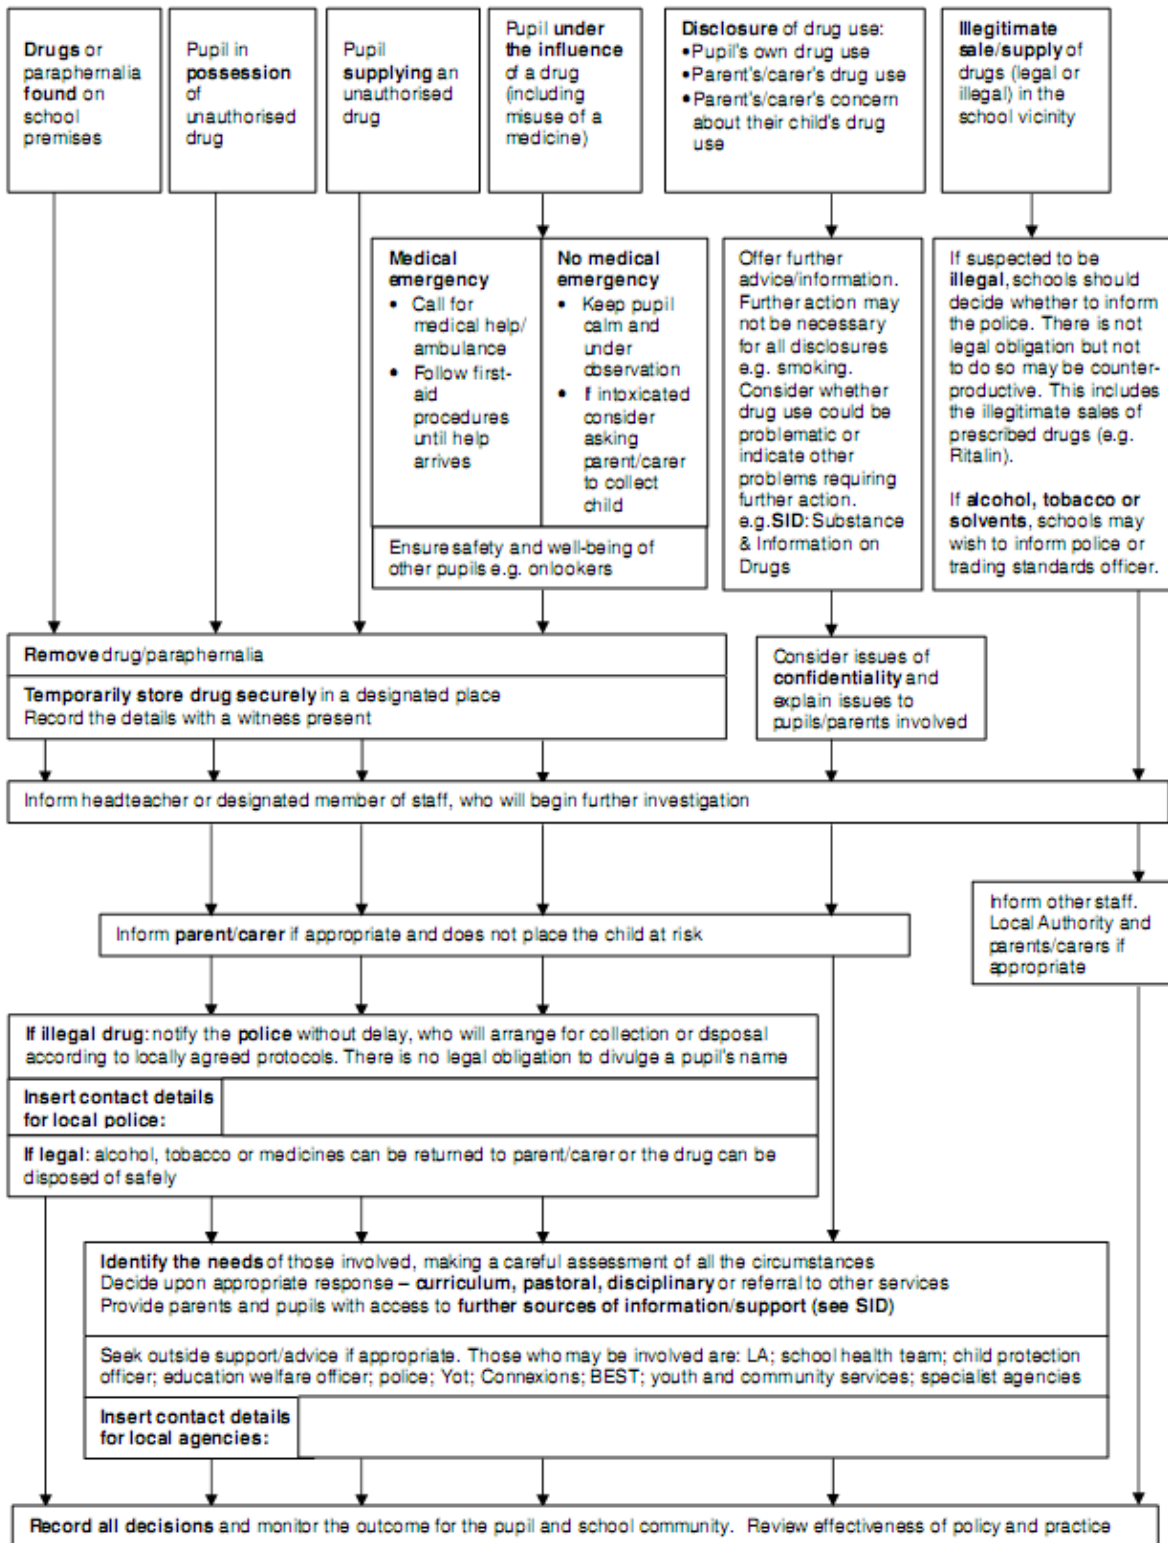

- pass on any information available, including vomit and any drug samples

Complete a medical record form as soon as you have dealt with the emergency.

This form is based on Appendix 9 of *Drugs: guidance for schools*.

"Drugs" refers to all drugs including medicines (prescription and "over the counter"), volatile substances, alcohol, tobacco and illegal drugs

APPENDIX B: Responding to incidents involving drugs

Appendix C: Record of incident involving unauthorised drug

- 1 For help and advice, telephone the LA
- 2 Complete this form WITHOUT identifying the pupil involved
- 3 Copy the form
- 4 Send the copy within 24 hours of the incident to the LA
- 5 KEEP the original, adding the pupil's name and form – store securely
